BarclaysHedge tracks 6,900 funds across 30 categories. The award is ranked on the growth performance of the **Portal Digital Fund strategy which saw a 46.6% cumulative net return for the 2020 calendar year.**

Deryck Graham, CEO of Portal Asset Management noted, “We are pleased with the early acknowledgement of Portal Digital Fund’s multi-advisor strategy which has been some 3 years in the making”.

Mark Witten, Senior Portfolio Manager with First Degree and Portfolio Manager of the Portal Digital Fund, said, “Although this nascent digital currency market is complex with high volatility and counter-party risk, we are pleased that the investment strategy performed above expectations whilst maintaining volatility below 15%.

# PORTAL

ASSET MANAGEMENT

Given the precarious state of the global equity, credit and real estate markets I believe Portal is well placed in the alternatives space as an attractive value proposition that offers a diversified, absolute return with tightly controlled risk."

The fund is designed to be uncorrelated with both traditional asset classes as well as the digital currency market and is focused on capital preservation.

It achieves this using tightly controlled risk via dynamic asset allocation and in-depth Due Diligence process.
